*Annual Total includes projections for May - December; **Highlighted** figure in each sector is the highest YTD of the five years shown

Key Variances:

- The **Construction** sector remains the main source of this years' strong showing. There are several major projects underway both in Building Construction (121% over 2012) and Heavy and Civil projects (181% over 2012). The combined increase of these two ($382k) is more than half of our gain over 2012.

- The **Miscellaneous sector** change from 2012 to 2013 is due to a prior year audit adjustment reducing 2012 totals in the banking subsector as well as a spike in Department of Licensing and the Washington State Pooled account. Nearly a third of the year over year gain ($22k) can be attributed to an increase within title companies.

Please see the attached pages for analysis, historical data and early projections for each sector identified above.
