**Key Variances:**

- The **Construction** sector changes from 2013 to 2014 is skewed by large major projects concluded in 2013. Excluding these projects, **this sector is \$89k (17.1%) over 2013.**
- The **Manufacturing** sector is over 2013 due to the transportation category. Boeing changed their reporting method utilizing a direct pay permit beginning with the November 2013 return. No amounts were reported during this transition month, with a higher amount being reported this month for December 2013. This method allows Boeing to stop paying sales tax to vendors and directly report all use tax based on the shipping destinations. Going forward this will result in higher use tax being reported from Boeing and less sales tax from other sectors. The transportation category of this sector is \$175k (145.2%) over 2013 while the remainder of this sector is \$21k (29.3%) above 2013.
