

Construction Completion Report Form for Submittal Exception Process

In accordance with WAC 246-290-120(5), a **Construction Completion Report Form** is required for all approved construction projects. Purveyors **must** submit a Construction Completion Report to the Department of Health (DOH) within sixty (60) days of completion and before use of any water system facility. This includes any storage tank and booster pump facilities reviewed under the submittal exception process as provided by WAC 246-290-125(3). Under the submittal exception process for other distribution-related facilities (including distribution main projects), designed by a professional engineer but not submitted to DOH for approval, the report does not need to be submitted. However, the purveyor **must** keep the Construction Completion Report on file and make it available for review upon request by DOH in accordance with WAC 246-290-125 (2)(b) and WAC 246-290-125(3)(f). Furthermore:

- (1) The report form **must** bear the seal, date and signature of a professional engineer (PE) licensed in the state of Washington;
- (2) If project construction is being completed in stages, attach a description of the portion of the project being completed as approved that is acknowledged by a PE on the date given below;
- (3) As future portions of staged construction projects are completed, each **must** be acknowledged by a PE; and
- (4) Per WAC 246-290-120(5)(c), the amount of change in the physical capacity of a system must be documented, if the project results in a change in physical capacity.

Please type or print legibly in ink:

CITY OF RENTON

DOH System ID No.: 71850L

Name of Water System

GEORGE STAHL

Name of Purveyor (Owner or System Contact)

3555 NE 2ND STREET
